Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

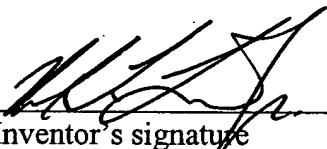

As an inventor named below, I hereby declare that:

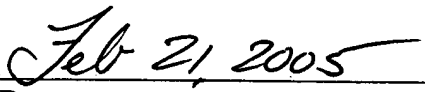

1. My residence, mailing address, and citizenship are correctly stated below next to my name.
2. I believe that I am an original inventor of the subject matter that is described and claimed in the above-identified patent, U.S. Patent No. 6,321,084, issued November 20, 2001, for which a reissue patent is sought on the invention and entitled APPARATUS AND METHOD FOR REDUCING OSCILLATOR FREQUENCY PULLING DURING AM MODULATION, the specification of which is enclosed herewith.
3. I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment to which reference has been made herein.
4. I acknowledge a duty to disclose information that is material to the patentability of the invention, as defined in 37 C.F.R. 1.56.

5. I believe that the original patent is wholly or partly inoperative or invalid by reason that the patentees claimed more or less than the patentees had the right to claim in the patent.
6. At least one error has been identified upon which the application for reissue is based, that being the following: In prosecuting the original application, along with my attorney, we did not realize until after the patent issued that the invention need not be limited to a  $3/2$  factor, which is found in claims 4-12. Rather the invention may use any non-unity factor that will result in a non-harmonic amplification of the frequency output of the circuit.
7. All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant or the assignee.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issued thereon or any patent to which this declaration is directed.
